Customer benefits

Saves on maintenance
Metallic detergent and ashless dispersant additive system provides high temperature deposit control in diesel engines. High oxidation stability protects against the formation of gums and varnish at elevated temperatures, and resists thickening, and oil line and filter plugging.

Longer engine life
Proven metallo-organic anti-wear additive system protects against wear of critically loaded components under all operating conditions. Multigrade viscosity provides additional protection against wear at start-up and under high temperature operating conditions.

Preserves power and performance
Metallic detergent and ashless dispersant additive system maintains power and performance by providing good upper-ring-belt deposit control, particularly under the high temperatures encountered in turbocharged diesel engines.

Applications
- Mixed fleets of diesel engines (high-speed, four-stroke, turbocharged or naturally aspirated).
- Gasoline engines (four-stroke) in mixed fleets of both diesel and gasoline engines
- Mixed fleets of both gasoline and diesel engines.
- Commercial road transport.
- Off-highway vehicles.
- Agricultural tractors.
- High speed diesel engines in marine service (e.g., fishing boats, river transport).
- Generator sets.
- Mobile hydraulic systems (where oil type and viscosity are appropriate).

Product features:
• Delo® Silver Multigrade is heavy-duty diesel engine oil designed to lubricate engines requiring API CF-4, CF/SG performance lubricants.
