

CALTEX

Four Stroke Lawn Mower and Stationary Engine Oil

Multifunctional Diesel & Gasoline Engine Oil

Product Data Sheet

Customer benefits

Prolongs engine life

High efficiency dispersant combination plus proven metallo-organic anti-wear additive system provides excellent protection against wear of critically loaded components under all operating conditions. Exceptional oxidation stability protects against the formation of gums and varnish at elevated temperatures.

Preserves full power and performance

Outstanding metallic detergent additive system preserves full power and performance by providing excellent upper-ring-belt deposit control under high temperature conditions

Applications

- Stationary gasoline engines (four-stroke, air- and water-cooled)
- Lawn mowers
- Small four-stroke gasoline powered generator sets
- Other portable power equipment
- Small stationary diesel engines

Product features:

- **Four Stroke Lawn Mower and Stationary Engine Oil** is a high performance, monograde engine oil intended primarily for the lubrication of gasoline engines requiring API SJ performance lubricants, and suitable for small diesel engines where API CF performance is specified.

Product specifications

FOUR STROKE LAWN MOWER AND STATIONARY ENGINE OIL

KEY PROPERTIES

SAE Grade	30
Product Code	501601
Base No., D2896, mgKOH/g	6.1
Phosphorus, mass %	0.08
Sulfated Ash, mass %	0.8
Viscosity, mm ² /s @ 40°C	102
mm ² /s @ 100°C	11.5
Viscosity Index	100
Zinc, mass %	0.09

0905

Performance standards

- API SJ
- API CF

ENVIRONMENT, HEALTH and SAFETY

Information is available on this product in the Material Safety Data Sheet (MSDS) and Customer Safety Guide. Customers are encouraged to review this information, follow precautions and comply with laws and regulations concerning product use and disposal. To obtain a MSDS for this product, visit: www.caltexoils.com.

This bulletin was prepared in good faith from the best information available at the time of issue. While the values and characteristics are considered representative, some variation, not affecting performance, can be expected. It is the responsibility of the user to ensure that the products are used in the applications for which they are intended.
