Product features:

- Havoline® Energy is a premium performance, friction modified multigrade motor oil formulated for use in modern passenger car and light truck gasoline and diesel engines.

- Havoline® Energy is certified against ACEA European Oil Sequences ACEA A1/B1 and A5/B5. It is formulated from high performance additive technology and synthetic base stocks to promote engine durability and improved fuel economy.

Customer benefits

Superior fuel economy
Synergistic combination of synthetic base fluids, oil soluble friction modifiers and a selected detergent/inhibitor system achieves very low friction coefficients. Viscosity characteristics are carefully chosen to minimize fluid frictional losses while providing adequate oil film thickness under all operating temperatures.

Long engine life
Metallic detergent and ashless dispersant additive system helps prevent engine failure, even under severe operating conditions, by providing superior control of ring belt and piston skirt deposits. Excellent low temperature viscosity characteristics ensure that vital engine components are lubricated quickly at start-up, even at very low temperatures.

Reduced maintenance costs
Proven thermal stability and oxidation resistance minimizes in-service oil degradation which contributes to filter blocking and sludge formation in the oil galleries, crankcase and valve train.

Low oil consumption
Very high viscosity index synthetic base oils control oil flow through the ring belt area by maintaining oil viscosity, and reduce oil evaporation at the elevated piston temperatures experienced under even very severe operating conditions.

Applications

- Gasoline and light duty diesel engines in modern passenger cars and light commercial vehicles.

- Particularly suitable for use in engines where oils meeting Ford specifications WSS-M2C913-D and WSS-M2C-913C are specified. These Ford approvals are also backwards compatible to WSSM2C913-B and WSS–M2C913A.
