

DEGREASER

DESCRIPTION

A solvent based degreasing agent that contains a unique blend of surfactants and detergents. Its specific properties are perfect for cutting through grease, oils and wax. Once it has attacked the grease/oil/wax, it leaves a detergent on the surface which emulsifies the remaining contaminants when flushed with water. Andrew Degreaser is a blend of clear, low viscosity aromatic liquid solvents and wetting agents giving rapid penetration and removal of heavy levels of grease, oil and other industrial contaminants on engines, machinery and all metal and painted surfaces. Andrew Degreaser gives excellent results whether used for cleaning smaller engine parts, in the home, garage or for major engine or machinery cleaning in industrial applications.

TYPICAL APPLICATIONS

Heavy duty cleaning purposes to remove dirt, light grease and oil, roadfilm etc. Excellent for cleaning workshop floors, machinery and engine parts.

DIRECTIONS FOR USE

Andrew Degreaser can be used either in a soak tank or be applied with a brush. Simply brush on working well into heavy soiled areas. Allow to soak for a few minutes then rinse by hosing off with water or clean solvent.

PACKAGE SIZES

12 x 1 Litres
4 x 5 Litres
20 Litres
200 Litres

Bulk and Other Pack sizes may be available on request.

HEALTH AND SAFETY INFORMATION

Hazard Rating Summary

Flammability	Moderate
Toxicity	Moderate
Body Contact	Moderate
Reactivity	Low
