

CALTEX

Four-Stroke Lawnmower and Stationary Engine Oil SAE 30

Product Data Sheet

Customer benefits

Prolongs engine life

High efficiency dispersant combination plus proven metallo-organic anti-wear additive system provides excellent protection against wear of critically loaded components under all operating conditions. Exceptional oxidation stability protects against the formation of gums and varnish at elevated temperatures.

Preserves full power and performance

Outstanding metallic detergent additive system preserves full power and performance by providing excellent upper-ring-belt deposit control under high temperature conditions

Applications

- Stationary gasoline engines (four-stroke, air- and water-cooled)
- Lawn mowers
- Small four-stroke gasoline powered generator sets
- Other portable power equipment
- Small stationary diesel engines

Product features:

- **Four-Stroke Lawnmower and Stationary Engine Oil SAE 30** is a high performance, monograde engine oil intended primarily for the lubrication of gasoline engines requiring API SJ performance lubricants, and suitable for small diesel engines where API CF performance is specified.

Product specifications

FOUR-STROKE LAWNMOWER AND STATIONARY ENGINE OIL SAE 30

KEY PROPERTIES

SAE Grade	30
Product Code	500734
Base No., D2896, mgKOH/g	10.0
Sulfated Ash, mass %	1.4
Viscosity, mm ² /s @ 40°C	93
mm ² /s @ 100°C	11.5
Viscosity Index	112
Zinc, mass %	0.12

0905

Performance standards

- API SJ
- API CF

ENVIRONMENT, HEALTH and SAFETY

Information is available on this product in the Material Safety Data Sheet (MSDS) and Customer Safety Guide. Customers are encouraged to review this information, follow precautions and comply with laws and regulations concerning product use and disposal. To obtain a MSDS for this product, visit: www.caltexoils.com.

This bulletin was prepared in good faith from the best information available at the time of issue. While the values and characteristics are considered representative, some variation, not affecting performance, can be expected. It is the responsibility of the user to ensure that the products are used in the applications for which they are intended.
